

XD4 Wi-Fi 5 Indoor Access Points

802.11ac High-Density Quad Radio AP's with Software-Defined Radios

QUICK LOOK:

- **High-density quad-radio 802.11ac Wave 2 3x3 and 4x4 APs**
- **Software-defined radios enable all-5 GHz deployment**
- **Application visibility and control of 2,000+ apps**
- **EasyPass simplified Wi-Fi access**
- **SSO with Office 365 and Google G Suite**

DELIVER SUPERIOR PRICE-PERFORMANCE

Cambium Networks' quad-radio XD4 series High Density Access Points are the highest capacity Wi-Fi AP in the industry, delivering massive scalability to meet the demands of today's mobile users. These High Density APs feature a powerful multi-core integrated controller, application-level intelligence, automated provisioning, and cloud or on-premises management. XD4 High Density APs are ideal for providing robust wireless connectivity in areas of medium to high density such as 1:1 classrooms, lecture halls, meeting rooms, open floor office areas and for Internet of Things (IoT) sensor networks. These highly extensible APs easily integrate with third party software through standards-based JSON APIs and the XD4-240 with Bluetooth Low Energy (BLE) radio is built ready for advanced capabilities such as location services.

SOFTWARE-DEFINED FLEXIBILITY

Packed with performance, the XD4 dual-radio APs support Software-Defined Radios (SDR) to deliver up to four times the 5 GHz Wi-Fi capacity compared to competitive APs. Instantly boost performance with the click of a mouse to adapt to changing client devices and optimize the user experience.

EASY TO MANAGE

Combined with the Xirrus Management System (XMS), the XD4 series APs deliver complete visibility and control of the Wi-Fi network, including users, devices, applications, network traffic and the RF environment - all from a single console. Designed for simple deployment, zero-touch configuration gets your network up and running in just minutes.

XD4 High-Density Wi-Fi 5 Access Points

Access Point Specifications

	XD4-130	XD4-240
Radios	4 - 2.4 GHz / 5 GHz software-defined radios	4 - 2.4 GHz / 5 GHz software-defined radios
	3x3 11ac 1.3 Gbps	4x4 11ac 3.47 Gbps
	SU-MIMO	MU-MIMO: 16 Streams
Maximum Wi-Fi Bandwidth	5.2 Gbps	13.88 Gbps
Dedicated Wi-Fi Threat Sensor	Yes	Yes
Bluetooth Technology	n/a	Yes
Antennas	12 (Internal)	16 (Internal)
Max TX Power Per Radio (conducted)	2.4/5 GHz bands: 22.5 dBm	2.4/5 GHz bands: 24 dBm
Maximum Wi-Fi Backhaul	3.9 Gbps	10.4 Gbps
Maximum Associated Users	960	960
Wired Uplinks 802.3ad <small>(AGGREGATE TRAFFIC), BROADCAST, LINK-BACKUP (FAILOVER), LOAD BALANCE, MIRRORED</small>	2 - 1 GbE	1 - 2.5 GbE, 1 - GbE
Maximum Power Consumption	25.5 W (802.3at PoE)	46 W
Dimensions	254 mm (10 in)	254 mm (10 in)
Weight	1,134 g (2.5 lbs)	1,043 g (2.3 lbs)
Operating Temperature	0°C to 50°C (32°F to 131°F), 5-90% humidity, non-condensing	
Storage Temperature	-40°C to 70°C (-40°F to 158°F)

ABOUT CAMBIUM NETWORKS

Cambium Networks empowers millions of people with wireless connectivity worldwide. Its wireless portfolio is used by commercial and government network operators as well as broadband service providers to connect people, places and things. With a single network architecture spanning fixed wireless and Wi-Fi, Cambium Networks enables operators to achieve maximum performance with minimal spectrum. End-to-end cloud management transforms networks into dynamic environments that evolve to meet changing needs with minimal physical human intervention. Cambium Networks empowers a growing ecosystem of partners who design and deliver gigabit wireless solutions that just work.
